

Rhino-Pan

Rhino-Pan™ is a revolutionary **solid cover** that's ideal for patios or carports. Protect your home, outdoor furniture, and automobiles from the sun's harmful UV Rays that cause fading, cracking, and deterioration.

- **High Performance Galvalume™**
- **12" X 3" Riser Pan**
- **25% Longer Spans**

Longer Spans

Rhino-Pan™ is a 3" riser panel that's designed for added strength, higher performance, and spans 25% farther than traditional patio covers. It's superior strength allows homeowners to construct covers without the addition of mid-span support beams.

Manufactured from Galvalume™ is a patented coating process that is designed to protect the high-performance alloy with corrosion inhibitors used to manufacture the Rhino-Pan™.

The Galvalume™ System

Solar Reflectance

The most important characteristic of a roof product in terms of yielding the highest energy savings during warmer months. The higher the solar reflective value the more efficient the product is in reflecting sunlight and heat away from the building and reducing roof temperature.

Energy Star

Qualified roof products reflect more of the sun's rays. This can lower roof surface temperature by up to 100F, decreasing the amount of heat transferred into a building. Please remember the Energy Savings that can be achieved with reflective roofing is highly dependent on facility design, R-value of the insulation used, climatic conditions, building location, and building envelope efficiency.
